Summer Research School
2017

Introduction

The core aim of our project is to create system that combines these techniques and to build "artificial teacher" that combines best practices in organizing training so that it will be interesting, useful and much easier for the students. The most important part of our project is to fertilize students, showing them that their subjects is not as difficult as sound

Why it is useful?

It's useful ...
- for self-study
- for modernizing education

It allows young people ...
- to touch new technologies

It can ...
- provoke the interest of young people in the subjects

Special thanks for:

- assoc. Zlatogor Minchev (BAS)
- ch. ace. Emil Kelevedjiev (BAS)

Acknowledges for:

- High School Students Institute of Mathematics and Informatics
- Bulgarian Academy of Sciences
- Sofia High School of Mathematics
- VR Express
